

Anti-PDGFR α Antibody Picoband[®] PE Conjugated

Catalog Number: A00366-PE

About PDGFR α

PDGFR α (Platelet-derived growth factor receptor, α), also called PDGFR2, encodes a cell surface tyrosine kinase receptor for members of the platelet-derived growth factor family. The PDGFR α gene is mapped on 4q12. The PDGFR α -FIP1L1 gene is a constitutively activated tyrosine kinase that transforms hematopoietic cells and is a therapeutic target of imatinib. The PDGFR α gene contains 23 exons spanning about 65 kb. Using the human PDGFR α promoter linked to a luciferase reporter, Joosten et al. showed that PAX1 acts as a transcriptional activator of the PDGFR α gene in differentiated human embryonal carcinoma cells. PDGFR α is responsible for mediating cellular contraction of multiple growth factors: TGF β 1 and members of the PDGF family. Lei et al. noted that in the rabbit model of the disease, PDGFR α is dramatically more capable of promoting PVR than is the closely related PDGFR β . PDGFR α is a critical receptor required for human CMV infection, and thus a target for novel antiviral therapies.

Overview

Product Name	Anti-PDGFR α Antibody Picoband [®] PE Conjugated
Reactive Species	Human, Mouse, Rat
Application	Flow Cytometry
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na ₂ HPO ₄ , 0.02% NaN ₃ .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Protect from light.
Host	Rabbit
Uniprot ID	P16234

Technical Details

Immunogen	E.coli-derived human PDGFR α recombinant protein (Position: Q24-E906).
Cross Reactivity	No cross-reactivity with other proteins.
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	PE Excitation Wavelength: 566 nm Emission Wavelength: 574 nm

Suggested Dilutions

Flow Cytometry, Optimal dilutions should be determined by end users.
