

## Anti-AHRR Antibody Picoband® FITC Conjugated

Catalog Number: A01515-3-FITC

### About AHRR

The aryl-hydrocarbon receptor repressor also known as AHRR is a human gene. The protein encoded by this gene participates in the aryl hydrocarbon receptor (AhR) signaling cascade, which mediates dioxin toxicity, and is involved in regulation of cell growth and differentiation. It functions as a feedback modulator by repressing AhR-dependent gene expression. Alternatively spliced transcript variants encoding different isoforms have been described for this gene.
