

Anti-RAD18 Antibody Picoband® FITC Conjugated

Catalog Number: A01622-2-FITC

About RAD18

E3 ubiquitin-protein ligase RAD18 is an enzyme that in humans is encoded by the RAD18 gene. The protein encoded by this gene is highly similar to *S. cerevisiae* DNA damage repair protein Rad18. Yeast Rad18 functions through its interaction with Rad6, which is an ubiquitin-conjugating enzyme required for post-replication repair of damaged DNA. Similar to its yeast counterpart, this protein is able to interact with the human homolog of yeast Rad6 protein through a conserved ring-finger motif. Mutation of this motif results in defective replication of UV-damaged DNA and hypersensitivity to multiple mutagens.
