

Anti-Endothelin A Receptor/ET-A/EDNRA Antibody Picoband® Fluoro488 Conjugated

Catalog Number: A01828-4-Fluoro488

About EDNRA

This gene encodes the receptor for endothelin-1, a peptide that plays a role in potent and long-lasting vasoconstriction. This receptor associates with guanine-nucleotide-binding (G) proteins, and this coupling activates a phosphatidylinositol-calcium second messenger system. Polymorphisms in this gene have been linked to migraine headache resistance. Alternative splicing results in multiple transcript variants.
