

## Anti-SRSF protein kinase 1 SRPK1 Antibody

Catalog Number: A01937-1

### About SRPK1

SRPK1 and SRPK2, two Arginine/serine-rich (SR) protein-specific kinases constitute control circuits to regulate both constitutive and alternative pre-mRNA splicing and coordinate splicing with transcription in cells (1). They are highly specific for the phosphorylation of these RS proteins, and highly expressed in testis (1,2). SRPK1 plays a role in the condensation of sperm chromatin and controls the intranuclear distribution of splicing factors in interphase cells and the reorganization of nuclear speckles during mitosis (3,4).

### Technical Details

Immunogen	SRPK1 antibody was raised against a 19 amino acid peptide from near the amino terminus of human SRPK1. The immunogen is located within the first 50 amino acids of SRPK1.
Cross Reactivity	SRPK1 antibody is human, mouse and rat reactive. Multiple isoforms of SRPK1 are known to exist; this antibody will detect all except isoforms b and e. SRPK1 antibody is predicted to not cross-react with SRPK2.
Isotype	IgG
Form	Liquid
Concentration	1 mg/mL
Purification	SRPK1 Antibody is affinity chromatography purified via peptide column.
Suggested Dilutions	Dilute the sample so that the expected range of concentrations fall within the detection range of this kit.

If the expected range of concentration is unknown, a pilot test should be conducted to decide the optimal dilution ratio for your samples.
