

## Anti-CIC-5/CLCN5 Antibody Picoband® HRP Conjugated

Catalog Number: A02286-2-HRP

### About CLCN5

The CLCN5 gene encodes the chloride channel Cl<sup>-</sup>/H<sup>+</sup> exchanger CIC-5. This gene encodes a member of the CIC family of chloride ion channels and ion transporters. The encoded protein is primarily localized to endosomal membranes and may function to facilitate albumin uptake by the renal proximal tubule. Mutations in this gene have been found in Dent disease and renal tubular disorders complicated by nephrolithiasis. Alternatively spliced transcript variants have been found for this gene.
