

Anti-MSI2 Antibody Picoband® APC Conjugated

Catalog Number: A02898-2-APC

About MSI2

This gene encodes an RNA-binding protein that is a member of the Musashi protein family. The encoded protein is transcriptional regulator that targets genes involved in development and cell cycle regulation. Mutations in this gene are associated with poor prognosis in certain types of cancers. This gene has also been shown to be rearranged in certain cancer cells.

Overview
