

Anti-Ager Antibody Picoband® FITC Conjugated

Catalog Number: A03438-2-FITC

About Ager

Enables S100 protein binding activity; advanced glycation end-product binding activity; and heparin binding activity. Involved in several processes, including cellular response to amyloid-beta; negative regulation of long-term synaptic potentiation; and positive regulation of cytokine production. Acts upstream of or within several processes, including induction of positive chemotaxis; negative regulation of advanced glycation end-product receptor activity; and positive regulation of macromolecule metabolic process. Located in extracellular space and plasma membrane. Is expressed in several structures, including alimentary system; brain; genitourinary system; hemolymphoid system gland; and lung. Human ortholog(s) of this gene implicated in several diseases, including autoimmune disease (multiple); cardiovascular system disease (multiple); cystic fibrosis; kidney failure (multiple); and lupus nephritis. Orthologous to human AGER (advanced glycosylation end-product specific receptor).

Overview

Product Name	Anti-Ager Antibody Picoband® FITC Conjugated
Reactive Species	Mouse, Rat
Application	Flow Cytometry
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na ₂ HPO ₄ , 0.02% NaN ₃ .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing. Protect from light.
Host	Rabbit
Uniprot ID	Q62151

Technical Details

Immunogen	E.coli-derived mouse Ager recombinant protein (Position: Q24-E320).
Cross Reactivity	No cross-reactivity with other proteins.
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	FITC Excitation Wavelength: 495 nm Emission Wavelength: 525 nm

Suggested Dilutions

Flow Cytometry, Optimal dilutions should be determined by end users.
