

## Anti-RANBP9 Antibody Picoband® FITC Conjugated

Catalog Number: A03448-1-FITC

### About RANBP9

Ran-binding protein 9 is a protein that in humans is encoded by the RANBP9 gene. This gene encodes a protein that binds RAN, a small GTP binding protein belonging to the RAS superfamily that is essential for the translocation of RNA and proteins through the nuclear pore complex. The protein encoded by this gene has also been shown to interact with several other proteins, including met proto-oncogene, homeodomain interacting protein kinase 2, androgen receptor, and cyclin-dependent kinase 11.
