

## Anti-PIAS2 Antibody Picoband® HRP Conjugated

Catalog Number: A04130-3-HRP

### About PIAS2

E3 SUMO-protein ligase PIAS2 is an enzyme that in humans is encoded by the PIAS2 gene. It is mapped to 18q21.1. This gene encodes a member of the protein inhibitor of activated STAT family, which function as SUMO E3 ligases and play important roles in many cellular processes by mediating the sumoylation of target proteins. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. Isoforms of the encoded protein enhance the sumoylation of specific target proteins including the p53 tumor suppressor protein, c-Jun, and the androgen receptor. A pseudogene of this gene is located on the short arm of chromosome 4. The symbol MIZ1 has also been associated with ZBTB17 which is a different gene located on chromosome 1.
