

## Anti-Peptide YY/PYY Antibody Biotin Conjugated

Catalog Number: A04223-1-Biotin

### About PYY

Peptide YY (PYY), also known as peptide tyrosine tyrosine, is a peptide that in humans is encoded by the PYY gene. This gene encodes a member of the neuropeptide Y (NPY) family of peptides. The encoded preproprotein is proteolytically processed to generate two alternative peptide products that differ in length by three amino acids. These peptides, secreted by endocrine cells in the gut, exhibit different binding affinities for each of the neuropeptide Y receptors. Binding of the encoded peptides to these receptors mediates regulation of pancreatic secretion, gut mobility and energy homeostasis. Rare variations in this gene could increase susceptibility to obesity and elevated serum levels of the encoded peptides may be associated with anorexia nervosa.

Take control of your experiments with tailored peptides. Our [custom peptide synthesis](#) allows you to take full control of your research objectives. Partner with us to access an extensive range of modifications and optimize your peptide properties for ultimate success.

### Overview

Product Name	Anti-Peptide YY/PYY Antibody Biotin Conjugated
Reactive Species	Human
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na <sub>2</sub> HPO <sub>4</sub> , 0.02% NaN <sub>3</sub> .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	P10082

### Technical Details

Immunogen	A synthetic peptide corresponding to a sequence in the middle region of human Peptide YY/PYY, which shares 91.7% amino acid (aa) sequence identity with both mouse and rat Peptide YY/PYY.
Cross Reactivity	No cross-reactivity with other proteins.
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	Biotin

Suggested Dilutions

The intended application should be selected according to the customer's experimental requirements.
