

## Anti-POMT1 Antibody Picoband® Biotin Conjugated

Catalog Number: A04295-1-Biotin

### About POMT1

Protein O-mannosyl-transferase 1 is an enzyme that in humans is encoded by the POMT1 gene. The protein encoded by this gene is an O-mannosyltransferase that requires interaction with the product of the POMT2 gene for enzymatic function. The encoded protein is found in the membrane of the endoplasmic reticulum. Defects in this gene are a cause of Walker-Warburg syndrome (WWS) and limb-girdle muscular dystrophy type 2K (LGMD2K). Several transcript variants encoding different isoforms have been found for this gene.

### Overview

Product Name	Anti-POMT1 Antibody Picoband® Biotin Conjugated
Reactive Species	Human, Rat
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na <sub>2</sub> HPO <sub>4</sub> , 0.02% NaN <sub>3</sub> .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	Q9Y6A1

### Technical Details

Immunogen	E.coli-derived human POMT1 recombinant protein (Position: H224-H747). Human POMT1 shares 81.1% and 80.9% amino acid (aa) sequence identity with mouse and rat POMT1, respectively.
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	Biotin
Suggested Dilutions	The intended application should be selected according to the customer's experimental requirements.
