

Anti-Thymidylate Synthase TYMS Antibody

Catalog Number: A04320-1

About TYMS

Thymidylate synthase catalyzes the methylation of deoxyuridylate to deoxythymidylate using 5,10-methylenetetrahydrofolate (methylene-THF) as a cofactor. This function maintains the dTMP (thymidine-5-prime monophosphate) pool critical for DNA replication and repair. The enzyme has been of interest as a target for cancer chemotherapeutic agents. It is considered to be the primary site of action for 5-fluorouracil, 5-fluoro-2-prime-deoxyuridine, and some folate analogs. Expression of this gene and that of a naturally occurring antisense transcript rTS alpha vary inversely when cell-growth progresses from late-log to plateau phase. Diseases associated with Thymidylate synthase include Rectal Neoplasm and Dihydropyrimidine Dehydrogenase Deficiency. Anti-Thymidylate synthase is useful for researchers interested in Circadian Rhythm, Metabolism and cell cycle research.

Overview

| | |
|----------------------|--|
| Product Name | Anti-Thymidylate Synthase TYMS Antibody |
| Reactive Species | Human |
| Description | Boster Bio Anti-Thymidylate Synthase TYMS Antibody (Catalog # A04320-1). Tested in WB applications. This antibody reacts with Human. |
| Application | WB |
| Clonality | Polyclonal |
| Formulation | 0.01% (w/v) Sodium Azide |
| Storage Instructions | Store vial at -20°C prior to opening. Aliquot contents and freeze at -20°C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4°C as an undiluted liquid. Dilute only prior to immediate use. Expiration date is one (1) year from date of opening. |
| Host | Rabbit |
| Uniprot ID | P04818 |

Technical Details

| | |
|---------------|--|
| Immunogen | This whole rabbit serum was prepared by repeated immunizations with recombinant human Thymidylate Synthase (36 kDa) produced in E.coli. |
| Form | Liquid (sterile filtered) |
| Concentration | 85 mg/mL by Refractometry |
| Purification | This antiserum is directed against human Thymidylate Synthase and is useful in determining its presence in various assays. Because inhibition of Thymidylate Synthase prevents DNA synthesis and cell proliferation, the enzyme is an important target for cancer chemotherapeutic drugs, specifically |

the fluoropyrimidine group of antineoplastic drugs used to treat solid tumors. In general, this antibody can detect antigen in a variety of human cells and tissues, as well as bacteria, African green monkey, rat and mouse. Somewhat lower dilutions may be required in some non-human cell lines. Anti-Thymidylate Synthase can detect Thymidylate Synthase by immunochemistry in proliferating cell cultures and tissues but does not stain nonproliferating cells. Normal colon mucosa shows weak staining; however, some colorectal cancer specimens show very strong staining.

Suggested Dilutions

Dilute the sample so that the expected range of concentrations fall within the detection range of this kit.

If the expected range of concentration is unknown, a pilot test should be conducted to decide the optimal dilution ratio for your samples.

Some PubMed article(s) citing the expression level of this target are as follows:

Boster Bio's internal QC testing used ELISA: 1:20,000 - 1:100,000

IHC: User Optimized

WB: 1:500 - 1:2,000

Anti-Thymidylate Synthase TYMS Antibody (A04320-1) Images

Western blot analysis of Thymidylate Synthase expression in HeLa cell extract using rabbit anti-Thymidylate Synthase polyclonal antibody (Catalog # A04320-1) at 1:500 (lane 1), 1:1000 (lane 2) and 1: 2000 (lane 3) respectively. Thymidylate Synthase at 36KD was detected. The blot was developed using chemiluminescence (ECL) method (Catalog # EK1002).
