

Anti-MSRA Antibody Picoband® Fluoro594 Conjugated

Catalog Number: A04413-2-Fluoro594

About MSRA

This gene encodes a ubiquitous and highly conserved protein that carries out the enzymatic reduction of methionine sulfoxide to methionine. Human and animal studies have shown the highest levels of expression in kidney and nervous tissue. The protein functions in the repair of oxidatively damaged proteins to restore biological activity. Alternative splicing results in multiple transcript variants.
