About CLEC9A

C-type lectin domain family 9 member A is a protein that in humans is encoded by the CLEC9A gene. CLEC9A is a group V C-type lectin-like receptor (CTLR) that functions as an activation receptor and is expressed on myeloid lineage cells. By genomic sequence analysis, this gene is mapped to chromosome 12p13.31, centromeric to CLEC12B (617573) and telomeric to CLEC1A (606782).
