

Anti-HIC5/TGFB111 Antibody Picoband® Biotin Conjugated

Catalog Number: A04630-2-Biotin

About TGFB111

Transforming growth factor beta-1-induced transcript 1 protein is a protein that in humans is encoded by the TGFB111 gene. This gene encodes a coactivator of the androgen receptor, a transcription factor which is activated by androgen and has a key role in male sexual differentiation. The encoded protein is thought to regulate androgen receptor activity and may have a role to play in the treatment of prostate cancer. Multiple transcript variants encoding different isoforms have been found for this gene.

Overview

Product Name	Anti-HIC5/TGFB111 Antibody Picoband® Biotin Conjugated
Reactive Species	Human, Monkey
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na ₂ HPO ₄ , 0.02% NaN ₃ .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	O43294

Technical Details

Immunogen	E.coli-derived human HIC5/TGFB111 recombinant protein (Position: E268-A447).
Cross Reactivity	No cross-reactivity with other proteins.
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	Biotin
Suggested Dilutions	The intended application should be selected according to the customer's experimental requirements.
