

## Anti-RAMP/ZMYM2 Antibody Picoband® Biotin Conjugated

Catalog Number: A04648-1-Biotin

### About ZMYM2

Zinc finger MYM-type protein 2 is a protein that in humans is encoded by the ZMYM2 gene. The protein encoded by this gene is a zinc finger protein that may act as a transcription factor. The encoded protein may be part of a BHC histone deacetylase complex. Translocation of this gene with the fibroblast growth factor receptor-1 gene (FGFR1) results in a fusion gene, which may be a cause of stem cell leukemia lymphoma syndrome (SCLL). Several transcript variants encoding the same protein have been found for this gene.
