Anti-JDP2 Antibody Picoband® HRP Conjugated

Catalog Number: A04870-2-HRP

About JDP2

Jun dimerization protein 2 (JUNDM2) is a protein that in humans is encoded by the JDP2 gene. Mouse Jdp2 is an inhibitory subunit of the differentiation regulatory factor (DRF) complex. Jdp2 repressed retinoic acid-induced transcription of the Jun gene by recruiting a histone deacetylase-3 -containing complex to the differentiation response element (DRE) of the Jun promoter. Expression of JDP2 was reduced in several human cancers compared with matched normal tissues. Human JDP2 has antitumorigenic properties.
