

## Anti-PTGIS/PGIS Antibody Picoband® HRP Conjugated

Catalog Number: A05053-2-HRP

### About PTGIS

Prostaglandin-I synthase (EC 5.3.99.4) also known as prostaglandin I<sub>2</sub> (prostacyclin) synthase (PTGIS) or CYP8A1 is an enzyme involved in prostanoid biosynthesis that in humans is encoded by the PTGIS gene. This gene encodes a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. However, this protein is considered a member of the cytochrome P450 superfamily on the basis of sequence similarity rather than functional similarity. This endoplasmic reticulum membrane protein catalyzes the conversion of prostaglandin H<sub>2</sub> to prostacyclin (prostaglandin I<sub>2</sub>), a potent vasodilator and inhibitor of platelet aggregation. An imbalance of prostacyclin and its physiological antagonist thromboxane A<sub>2</sub> contribute to the development of myocardial infarction, stroke, and atherosclerosis.

### Overview

Product Name	Anti-PTGIS/PGIS Antibody Picoband® HRP Conjugated
Reactive Species	Human, Mouse, Rat
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na <sub>2</sub> HPO <sub>4</sub> .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	Q16647

### Technical Details

Immunogen	E.coli-derived human PTGIS/PGIS recombinant protein (Position: D119-D470).
Cross Reactivity	No cross-reactivity with other proteins.
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	HRP
Suggested Dilutions	The intended application should be selected according to the customer's experimental requirements.
