

## Anti-ASF1B Antibody Picoband® Fluoro647 Conjugated

Catalog Number: A05211-2-Fluoro647

### About ASF1B

Histone chaperone ASF1B is a protein that in humans is encoded by the ASF1B gene. This gene encodes a member of the H3/H4 family of histone chaperone proteins and is similar to the anti-silencing function-1 gene in yeast. The encoded protein is the substrate of the tousel-like kinase family of cell cycle-regulated kinases, and may play a key role in modulating the nucleosome structure of chromatin by ensuring a constant supply of histones at sites of nucleosome assembly.
