Catalog Number: A05385-1-Biotin

### About STARD3

StAR related lipid transfer domain containing 3 (STARD3) is a protein that in humans is encoded by the STARD3 gene. This gene encodes a member of a subfamily of lipid trafficking proteins that are characterized by a C-terminal steroidogenic acute regulatory domain and an N-terminal metastatic lymph node 64 domain. The encoded protein localizes to the membranes of late endosomes and may be involved in exporting cholesterol. Alternative splicing results in multiple transcript variants.
