

## Anti-EIF4H Antibody Picoband® Fluoro594 Conjugated

Catalog Number: A05539-1-Fluoro594

### About EIF4H

This gene encodes one of the translation initiation factors, which functions to stimulate the initiation of protein synthesis at the level of mRNA utilization. This gene is deleted in Williams syndrome, a multisystem developmental disorder caused by the deletion of contiguous genes at 7q11.23. Alternative splicing of this gene generates 2 transcript variants.
