Catalog Number: A05918-1-APC

About SSX2IP

Afadin- and alpha-actinin-binding protein is a protein that in humans is encoded by the SSX2IP gene. This gene encodes a protein that binds the cancer-testis antigen Synovial Sarcoma X breakpoint 2 protein. The encoded protein may regulate the activity of Synovial Sarcoma X breakpoint 2 protein in malignant cells. Alternate splicing results in multiple transcript variants. A pseudogene of this gene is found on chromosome 3.
