

Anti-IGBP1 Antibody Picoband® FITC Conjugated

Catalog Number: A05930-2-FITC

About IGBP1

Immunoglobulin-binding protein 1 is a protein that in humans is encoded by the IGBP1 gene. The proliferation and differentiation of B cells is dependent upon a B-cell antigen receptor (BCR) complex. Binding of antigens to specific B-cell receptors results in a tyrosine phosphorylation reaction through the BCR complex and leads to multiple signal transduction pathways.
