

Anti-RCC2 Antibody Picoband® Fluoro488 Conjugated

Catalog Number: A06203-2-Fluoro488

About RCC2

Protein RCC2 also known as telophase disk protein of 60 kDa (TD-60) or RCC1-like protein TD-60 is a protein that in humans is encoded by the RCC2 gene. The protein encoded by this gene is a guanine exchange factor that is active on Ra1A, a small GTPase. The encoded protein and Ra1A are both essential for proper kinetochore-microtubule function in early mitosis. This protein has been shown to be a biomarker for colorectal cancer.
