

Anti-PPA2 Antibody Picoband® Biotin Conjugated

Catalog Number: A06587-Biotin

About PPA2

Inorganic pyrophosphatase 2, mitochondrial is a protein that in humans is encoded by the PPA2 gene. It is mapped to 4q24. The protein encoded by this gene is localized to the mitochondrion, is highly similar to members of the inorganic pyrophosphatase (PPase) family, and contains the signature sequence essential for the catalytic activity of PPase. PPases catalyze the hydrolysis of pyrophosphate to inorganic phosphate, which is important for the phosphate metabolism of cells. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
