

Anti-Calponin 3/CNN3 Antibody Picoband® APC Conjugated

Catalog Number: A08267-4-APC

About CNN3

Calponin 3, acidic is a protein that in humans is encoded by the CNN3 gene. This gene encodes a protein with a markedly acidic C terminus; the basic N-terminus is highly homologous to the N-terminus of a related gene, CNN1. Members of the CNN gene family all contain similar tandemly repeated motifs. This encoded protein is associated with the cytoskeleton but is not involved in contraction.
