### About LARP6

La-related protein 6 (LARP6), also known as Acheron or La ribonucleoprotein domain family member 6, is a protein encoded by the LARP6 gene in humans. It is a member of the LARP superfamily of RNA-binding proteins, which are post-transcriptional regulators. It is a phosphoprotein and eight phosphorylation sites have been identified. Six of these phosphorylation sites reside in the C-terminal domain of LARP6 (CTER). These sites are Ser348, Ser396, Ser409, Ser421, Ser447, and Ser451 (PMID: 27011170).
