

## Anti-FEZF1 Antibody Picoband® Biotin Conjugated

Catalog Number: A09653-1-Biotin

### About FEZF1

FEZ family zinc finger 1 is a protein that in humans is encoded by the FEZF1 gene. This gene encodes a transcriptional repressor that belongs to the zinc finger double domain protein family. The encoded protein is thought to play a role in the embryonic migration of gonadotropin-releasing hormone neurons into the brain. Mutations in this gene are associated with hypogonadotropic hypogonadism-22 with anosmia. Alternative splicing results in multiple transcript variants.
