

Anti-GNL1 Antibody

Catalog Number: A09923

About GNL1

Cybr (Pscdbp) is a new scaffold protein with significant homology to Tamalin. It contains a PDZ binding domain and a coiled-coil domain. Cybr is highly expressed in the immune system, and its expression seems to be common to nearly all immune cell populations (T cells, B cells, NK Macrophages, dendritic cells). Other organs/tissues in which Cybr is expressed include lung, kidney, intestine and testes. Cybr may play an important in vivo role in cell migration, especially when modulated by pro-inflammatory cytokines. Anti-Cybr Antibody is suitable for researchers interested in the Research Areas of Chromatin, Immunology, Neuroscience, and Signal Transduction.
