

Anti-GNPDA1 Antibody

Catalog Number: A10820

About GNPDA1

This antibody is suitable for Cancer, Immunology and Nuclear Signaling research. TMBIM1 (Transmembrane BAX inhibitor motif-containing protein 1) is a member of the 7 TMS (7 transmembrane domains) family of receptors known to mediate the activation of various transcription factors. TMBIM1 is identified as a novel modulator of NF- κ B activation. A drosophila homolog of this protein (dNMDA1 with 40% homology to hTMBIM1) is reported to be unregulated during aging and oxidative stress.

Overview

Product Name	Anti-GNPDA1 Antibody
Reactive Species	Human
Description	Boster Bio Anti-GNPDA1 Antibody (Catalog# A10820). Tested in WB application(s). This antibody reacts with Human.
Application	WB
Clonality	Polyclonal
Formulation	100 μ g in 200 μ l PBS containing 0.05% stabilizing protein and 0.05% sodium azide This antibody is supplied in a stabilized formulation. Compatibility with conjugation reactions depends on the chemistry of the conjugation method used. For conjugation methods that are not compatible with the stabilizing components present in this formulation, a carrier-free antibody format is required.
Storage Instructions	Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid repeated freeze and thaw cycles.
Host	Rabbit
Uniprot ID	P46926

Technical Details

Immunogen	A partial length recombinant GNPDA1 protein (amino acids 13-242)
Predicted Reactive Species	Chimpanzee
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5-1mg/ml, actual concentration vary by lot. Use suggested dilution ratio to decide dilution procedure.
Purification	Protein A Chromatography

Suggested Dilutions

Western blot: 1-2 $\mu\text{g/ml}$
