

Anti-REXO2 Antibody Picoband® Fluoro594 Conjugated

Catalog Number: A10835-1-Fluoro594

About REXO2

REX2, RNA exonuclease 2 homolog (*S. cerevisiae*), also known as REXO2, is an enzyme which in humans is encoded by the REXO2 gene. This gene encodes a 3'-to-5' exonuclease specific for small (primarily 5 nucleotides or less in length) single-stranded RNA and DNA oligomers. This protein may have a role in DNA repair, replication, and recombination, and in RNA processing and degradation. It may also be involved in resistance of human cells to UV-C-induced cell death through its role in the DNA repair process.
