

Anti-DUSP13, SKRP4 Antibody

Catalog Number: A11187

About DUSP13

This antibody is suitable for Cancer, Immunology and Nuclear Signaling research. TMBIM1 (Transmembrane BAX inhibitor motif-containing protein 1) is a member of the 7 TMS (7 transmembrane domains) family of receptors known to mediate the activation of various transcription factors. TMBIM1 is identified as a novel modulator of NF- κ B activation. A drosophila homolog of this protein (dnMDA1 with 40% homology to hTMBIM1) is reported to be unregulated during aging and oxidative stress.
