

## Anti-ERLEC1 Antibody Picoband® Fluoro488 Conjugated

Catalog Number: A11245-1-Fluoro488

### About ERLEC1

Endoplasmic reticulum lectin 1 is a protein that in humans is encoded by the ERLEC1 gene. This gene encodes a resident endoplasmic reticulum (ER) protein that functions in N-glycan recognition. This protein is thought to be involved in ER-associated degradation via its interaction with the membrane-associated ubiquitin ligase complex. It also functions as a regulator of multiple cellular stress-response pathways in a manner that promotes metastatic cell survival. Alternative splicing results in multiple transcript variants. A related pseudogene has been identified on chromosome 21.
