

## Anti-SLC24A2 Antibody Picoband® Fluoro647 Conjugated

Catalog Number: A11621-1-Fluoro647

### About SLC24A2

This gene encodes a member of the calcium/cation antiporter superfamily of transport proteins. The encoded protein belongs to the SLC24 branch of exchangers, which can mediate the extrusion of one Ca<sup>2+</sup> ion and one K<sup>+</sup> ion in exchange for four Na<sup>+</sup> ions. This family member is a retinal cone/brain exchanger that can mediate a light-induced decrease in free Ca<sup>2+</sup> concentration. This protein may also play a neuroprotective role during ischemic brain injury. Alternative splicing results in multiple transcript variants.
