

## Anti-DAK/TKFC Antibody Picoband® Biotin Conjugated

Catalog Number: A12154-2-Biotin

### About TKFC

This gene is a member of the family of dihydroxyacetone kinases, which have a protein structure distinct from other kinases. The product of this gene phosphorylates dihydroxyacetone, and also catalyzes the formation of riboflavin 4',5'-phosphate (aka cyclin FMN) from FAD. Several alternatively spliced transcript variants have been found for this gene.
