

Anti-DZIP1L Antibody

Catalog Number: A14249

About DZIP1L

DZIP1L, or DAZ interacting zinc finger protein 1-like, is a protein implicated in autosomal recessive polycystic kidney disease (ARPKD). DZIP1L has been shown to localize to centrioles and at the distal end of basal bodies, interacting with septin2, a protein that maintains the periciliary diffusion barrier at the ciliary transition zone (PMID: 28530676).

Overview

Product Name	Anti-DZIP1L Antibody
Reactive Species	Human, Mouse
Description	Boster Bio Anti-DZIP1L Antibody catalog # A14249. Tested in WB, ELISA applications. This antibody reacts with Human, Mouse.
Application	ELISA, WB
Clonality	Polyclonal
Formulation	500 ug/ml antibody with PBS, 0.02% NaN ₃ , 1 mg stabilizing protein and 50% glycerol This antibody is supplied in a stabilized formulation. Compatibility with conjugation reactions depends on the chemistry of the conjugation method used. For conjugation methods that are not compatible with the stabilizing components present in this formulation, a carrier-free antibody format is required.
Storage Instructions	12 months from date of receipt -20°C as supplied. 6 months 2 to 8°C after reconstitution. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	Q8IYY4

Technical Details

Immunogen	E.coli-derived human DZIP1L recombinant protein (Position: V420-V764).
Form	Liquid
Concentration	500 ug/ml
Purification	Immunogen affinity purified.
Suggested Dilutions	Western blot, 1:500-2000 ELISA, 1:100-1000
