

Anti-INTS9 Antibody

Catalog Number: A14687-1

About INTS9

INTS9, also known as Integrator Complex Subunit 9, is part of the core cleavage module consisting of INTS4/INTS9/INTS11 involved in processing small nuclear RNA (snRNA) molecules. It is a subunit of the Integrator complex, which comprises 15 subunits (including INTS6L), and plays a crucial role in the 3' end processing of snRNAs. By participating in the biogenesis of snRNAs, INTS9 contributes to the proper functioning of the spliceosome, a cellular machinery responsible for the accurate splicing of precursor messenger RNA (pre-mRNA) molecules. This process is essential for generating mature messenger RNA (mRNA), which is subsequently translated into functional proteins.

Overview

Product Name	Anti-INTS9 Antibody
Reactive Species	Human
Description	Boster Bio Anti-INTS9 Antibody catalog # A14687-1. Tested in WB, IHC, IP, ELISA applications. This antibody reacts with Human.
Application	ELISA, IP, IHC, WB
Clonality	Polyclonal
Formulation	500 ug/ml antibody with PBS, 0.02% NaN ₃ , 1 mg stabilizing protein and 50% glycerol This antibody is supplied in a stabilized formulation. Compatibility with conjugation reactions depends on the chemistry of the conjugation method used. For conjugation methods that are not compatible with the stabilizing components present in this formulation, a carrier-free antibody format is required.
Storage Instructions	12 months from date of receipt at -20°C as supplied. 6 months at 2 to 8°C after reconstitution. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	Q9NV88

Technical Details

Immunogen	E.coli-derived human INTS9 recombinant protein (Position: C311-Q656).
Form	Liquid
Concentration	500 ug/ml
Purification	Immunogen affinity purified.
Suggested Dilutions	Western blot, 1:500-2000 Immunohistochemistry, 1:50-400 ELISA, 1:100-1000
