

Anti-RNF26 Antibody

Catalog Number: A15996

About RNF26

RNF26 was identified as a member of a novel C3HC5 ring finger subfamily (1). RNF26 is ubiquitously expressed in human tissues but has been found to be upregulated in several cancer cell lines including HL-60, HeLa S3, and SW480, as well as 50% of primary gastric cancers. While the substrates of RNF26 ubiquitination have not yet been identified, the upregulation of RNF26 in several types of cancer suggest that it may serve as a target for therapeutic treatment (1).
