

Anti-Zebrafish Thyroglobulin/TG Antibody Picoband®

Catalog Number: AZA0A193GP06

About TG

Acts upstream of or within regulation of thyroid hormone generation. Located in extracellular region. Is expressed in pharyngeal arch; thyroid follicle; and thyroid primordium. Human ortholog(s) of this gene implicated in autoimmune disease of endocrine system (multiple); goiter; liver disease (multiple); and thyroid dysmorphogenesis 3. Orthologous to human TG (thyroglobulin).

Overview

Product Name	Anti-Zebrafish Thyroglobulin/TG Antibody Picoband®
Reactive Species	Zebrafish
Description	Boster Bio Anti-Zebrafish Thyroglobulin/TG Antibody Picoband® catalog # AZA0A193GP06. Tested in WB applications. This antibody reacts with Zebrafish. The brand Picoband indicates this is a premium antibody that guarantees superior quality, high affinity, and strong signals with minimal background in Western blot applications. Only our best-performing antibodies are designated as Picoband, ensuring unmatched performance.
Application	WB
Clonality	Polyclonal
Formulation	Each vial contains 4 mg Trehalose, 0.9 mg NaCl, 0.2 mg Na ₂ HPO ₄ .
Storage Instructions	At -20°C for one year from date of receipt. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for six months. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	A0A193GP06

Technical Details

Immunogen	E.coli-derived Zebrafish Thyroglobulin/TG recombinant protein (Position: E1839-E2513).
Form	Lyophilized
Concentration	Adding 0.2 ml of distilled water will yield a concentration of 500 ug/ml.
Purification	Immunogen affinity purified.
Suggested Dilutions	Western blot, 0.25-0.5 ug/ml, Zebrafish

Anti-Zebrafish Thyroglobulin/TG Antibody Picoband® (AZA0A193GP06) Images

Western blot analysis of Thyroglobulin/TG using anti-Thyroglobulin/TG antibody (AZA0A193GP06). Electrophoresis was performed on a 8% SDS-PAGE gel at 80V (Stacking gel) / 120V (Resolving gel) for 2 hours. The sample well of each lane was loaded with 30 ug of sample under reducing conditions. Lane 1: zebrafish head tissue lysates. After electrophoresis, proteins were transferred to a nitrocellulose membrane at 150 mA for 50-90 minutes. Blocked the membrane with 5% non-fat milk/TBS for 1.5 hour at RT. The membrane was incubated with rabbit anti-Thyroglobulin/TG antigen affinity purified polyclonal antibody (AZA0A193GP06) at 0.5 ug/mL overnight at 4°C, then washed with TBS-0.1% Tween 3 times with 5 minutes each and probed with a goat anti-rabbit IgG-HRP secondary antibody at a dilution of 1:5000 for 1.5 hour at RT. The signal is developed using an ECL Plus Western Blotting Substrate (Catalog # AR1196-200) with Tanon 5200 system. A specific band was detected for Thyroglobulin/TG at approximately 305 kDa. The expected band size for Thyroglobulin/TG is at 299 kDa.
