

Anti-Zebrafish IHHA Antibody Picoband®

Catalog Number: AZA3KNS3

About IHHA

Predicted to enable calcium ion binding activity and patched binding activity. Acts upstream of or within several processes, including enteric nervous system development; intramembranous ossification; and swim bladder morphogenesis. Predicted to be located in several cellular components, including Golgi membrane; endoplasmic reticulum membrane; and extracellular region. Predicted to be active in extracellular space. Is expressed in several structures, including caudal fin skeleton; cranium; digestive system; pneumatic duct; and swim bladder bud. Human ortholog(s) of this gene implicated in acrocapitofemoral dysplasia; brachydactyly type A1; retinopathy of prematurity; and syndactyly type 1. Orthologous to human IHH (Indian hedgehog signaling molecule).

Overview

Product Name	Anti-Zebrafish IHHA Antibody Picoband®
Reactive Species	Zebrafish
Description	Boster Bio Anti-Zebrafish IHHA Antibody Picoband® catalog # AZA3KNS3. Tested in WB, IHC applications. This antibody reacts with Zebrafish. The brand Picoband indicates this is a premium antibody that guarantees superior quality, high affinity, and strong signals with minimal background in Western blot applications. Only our best-performing antibodies are designated as Picoband, ensuring unmatched performance.
Application	IHC, WB
Clonality	Polyclonal
Formulation	Each vial contains 4 mg Trehalose, 0.9 mg NaCl, 0.2 mg Na ₂ HPO ₄ .
Storage Instructions	At -20°C for one year from date of receipt. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for six months. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	A3KNS3

Technical Details

Immunogen	E.coli-derived Zebrafish IHHA recombinant protein (Position: A203-R413).
Form	Lyophilized
Concentration	Adding 0.2 ml of distilled water will yield a concentration of 500 ug/ml.
Purification	Immunogen affinity purified.
Suggested Dilutions	Western blot, 0.25-0.5 ug/ml, Zebrafish Immunohistochemistry(Paraffin-embedded Section), 2-5 ug/ml, Zebrafish

Anti-Zebrafish IHHA Antibody Picoband® (AZA3KNS3) Images

Western blot analysis of IHHA using anti-IHHA antibody (AZA3KNS3). Electrophoresis was performed on a 10% SDS-PAGE gel at 80V (Stacking gel) / 120V (Resolving gel) for 2 hours. The sample well of each lane was loaded with 30 ug of sample under reducing conditions. Lane 1: zebrafish head tissue lysates, Lane 2: zebrafish embryo tissue lysates. After electrophoresis, proteins were transferred to a nitrocellulose membrane at 150 mA for 50-90 minutes. Blocked the membrane with 5% non-fat milk/TBS for 1.5 hour at RT. The membrane was incubated with rabbit anti-IHHA antigen affinity purified polyclonal antibody (AZA3KNS3) at 0.5 ug/mL overnight at 4°C, then washed with TBS-0.1% Tween 3 times with 5 minutes each and probed with a goat anti-rabbit IgG-HRP secondary antibody at a dilution of 1:5000 for 1.5 hour at RT. The signal is developed using an ECL Plus Western Blotting Substrate (Catalog # AR1196-200) with Tanon 5200 system. A specific band was detected for IHHA at approximately 45 kDa. The expected band size for IHHA is at 45 kDa.

IHC analysis of IHHA using anti-IHHA antibody (AZA3KNS3). IHHA was detected in a paraffin-embedded section of zebrafish colon tissue. Heat mediated antigen retrieval was performed in EDTA buffer (pH 8.0, epitope retrieval solution). The tissue section was blocked with 10% goat serum. The tissue section was then incubated with 2 ug/ml rabbit anti-IHHA Antibody (AZA3KNS3) overnight at 4°C. Peroxidase Conjugated Goat Anti-rabbit IgG was used as secondary antibody and incubated for 30 minutes at 37°C. The tissue section was developed using HRP Conjugated Rabbit IgG Super Vision Assay Kit (Catalog # SV0002) with DAB as the chromogen.
