Catalog Number: AZQ6EJB7-Fluoro594

About SOX3

Enables DNA-binding transcription activator activity, RNA polymerase II-specific. Contributes to DNA-binding transcription factor activity. Involved in regulation of transcription by RNA polymerase II. Acts upstream of or within several processes, including nervous system development; otic placode development; and otic placode formation. Predicted to be active in nucleus. Is expressed in several structures, including ectoderm; nervous system; neural keel; neural tube; and presumptive structure. Human ortholog(s) of this gene implicated in X-linked panhypopituitarism. Orthologous to human SOX3 (SRY-box transcription factor 3).
