

Anti-Zebrafish PDCD10a/b Antibody HRP Conjugated

Catalog Number: AZQ6PHH3-HRP

About PDCD10a/b

Programmed cell death protein 10 is a protein that in humans is encoded by the PDCD10 gene. This gene encodes an evolutionarily conserved protein associated with cell apoptosis. The protein interacts with the serine/threonine protein kinase MST4 to modulate the extracellular signal-regulated kinase (ERK) pathway. It also interacts with and is phosphorylated by serine/threonine kinase 25, and is thought to function in a signaling pathway essential for vascular development. Mutations in this gene are one cause of cerebral cavernous malformations, which are vascular malformations that cause seizures and cerebral hemorrhages. Multiple alternatively spliced variants, encoding the same protein, have been identified.

Overview

Product Name	Anti-Zebrafish PDCD10a/b Antibody HRP Conjugated
Reactive Species	Zebrafish
Clonality	Polyclonal
Formulation	Each vial contains 50% glycerol, 0.9% NaCl, 0.2% Na ₂ HPO ₄ .
Storage Instructions	At -20°C for one year from date of receipt. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	Q6PHH3/Q6NWL1

Technical Details

Immunogen	E.coli-derived zebrafish PDCD10a/b recombinant protein (Position: M1-A210).
Form	Liquid
Concentration	0.5 mg/mL
Purification	Immunogen affinity purified.
Conjugate	HRP
