

Anti-Zebrafish RAB4Aa Antibody Picoband® FITC Conjugated

Catalog Number: AZQ6PHI9-FITC

About RAB4a

This gene is a member of the largest group in the Ras superfamily of small GTPases, which regulate membrane trafficking. The encoded protein is associated with early endosomes and is involved in their sorting and recycling. The protein also plays a role in regulating the recycling of receptors from endosomes to the plasma membrane. Alternatively spliced transcript variants have been observed for this gene.
