

Anti-Zebrafish CPEB1 Antibody Picoband®

Catalog Number: AZQ9YGX5

About CPEB1

Enables RNA binding activity. Predicted to be involved in several processes, including cellular response to hypoxia; cellular response to insulin stimulus; and regulation of primary metabolic process. Predicted to act upstream of or within mRNA processing and regulation of translation. Part of protein-containing complex. Is expressed in blastomere; germ line cell; nervous system; and notochord. Orthologous to human CPEB1 (cytoplasmic polyadenylation element binding protein 1).

Overview

Product Name	Anti-Zebrafish CPEB1 Antibody Picoband®
Reactive Species	Zebrafish
Description	Boster Bio Anti-Zebrafish CPEB1 Antibody Picoband® catalog # AZQ9YGX5. Tested in WB applications. This antibody reacts with Zebrafish. The brand Picoband indicates this is a premium antibody that guarantees superior quality, high affinity, and strong signals with minimal background in Western blot applications. Only our best-performing antibodies are designated as Picoband, ensuring unmatched performance.
Application	WB
Clonality	Polyclonal
Formulation	Each vial contains 4 mg Trehalose, 0.9 mg NaCl, 0.2 mg Na ₂ HPO ₄ .
Storage Instructions	At -20°C for one year from date of receipt. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for six months. Avoid repeated freezing and thawing.
Host	Rabbit
Uniprot ID	Q9YGX5

Technical Details

Immunogen	E.coli-derived Zebrafish CPEB1 recombinant protein (Position: A53-N559).
Form	Lyophilized

Concentration	Adding 0.2 ml of distilled water will yield a concentration of 500 ug/ml.
Purification	Immunogen affinity purified.
Suggested Dilutions	Western blot, 0.25-0.5 ug/ml, Zebrafish

Anti-Zebrafish CPEB1 Antibody Picoband® (AZQ9YGX5) Images

Western blot analysis of CPEB1 using anti-CPEB1 antibody (AZQ9YGX5). Electrophoresis was performed on a 10% SDS-PAGE gel at 80V (Stacking gel) / 120V (Resolving gel) for 2 hours. The sample well of each lane was loaded with 30 ug of sample under reducing conditions. Lane 1: whole female zebrafish tissue lysates, Lane 2: zebrafish embryo tissue lysates. After electrophoresis, proteins were transferred to a nitrocellulose membrane at 150 mA for 50-90 minutes. Blocked the membrane with 5% non-fat milk/TBS for 1.5 hour at RT. The membrane was incubated with rabbit anti-CPEB1 antigen affinity purified polyclonal antibody (AZQ9YGX5) at 0.5 ug/mL overnight at 4°C, then washed with TBS-0.1% Tween 3 times with 5 minutes each and probed with a goat anti-rabbit IgG-HRP secondary antibody at a dilution of 1:5000 for 1.5 hour at RT. The signal is developed using an ECL Plus Western Blotting Substrate (Catalog # AR1196-200) with Tanon 5200 system. A specific band was detected for CPEB1 at approximately 62 kDa. The expected band size for CPEB1 is at 62 kDa.

Anti-Zebrafish CPEB1 Antibody

For Research Use Only. Not for use in diagnostic procedures.
