

## Anti-HGS Antibody Picoband® (monoclonal, 4B7E2) Fluoro647 Conjugated

Catalog Number: M01174-2-Fluoro647

### About HGS

Hepatocyte growth factor-regulated tyrosine kinase substrate is an enzyme that in humans is encoded by the HGS gene. It is mapped to 17q25.3. The protein encoded by this gene regulates endosomal sorting and plays a critical role in the recycling and degradation of membrane receptors. The encoded protein sorts monoubiquitinated membrane proteins into the multivesicular body, targeting these proteins for lysosome-dependent degradation.
