

Anti-CTBP1 Purified Rabbit Monoclonal Antibody

Catalog Number: M02123

About CTBP1

C-terminal binding protein 1 / brefeldin A (BFA)-dependent ADP-ribosylation substrate (CtBP1/BARS) is a highly conserved transcriptional corepressor, that plays a critical role in regulating gene expression patterns throughout development and in oncogenesis. CtBP regulates target gene transcription, in part, via recruitment of histone deacetylases involved in gene silencing and may act to coordinate histone modifications that regulate gene expression.

Overview

Product Name	Anti-CTBP1 Purified Rabbit Monoclonal Antibody
Reactive Species	Human, Mouse
Description	Boster Bio Anti-CTBP1 Purified Rabbit Monoclonal Antibody (Catalog# M02123). Tested in IP, WB, ICC application(s). This antibody reacts with Mouse, Human.
Application	IP, ICC, WB
Clonality	Monoclonal PAb (511)
Formulation	Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide
Storage Instructions	Store at 2-8°C. Do not freeze.
Host	Rabbit
Uniprot ID	Q13363

Technical Details

Immunogen	Bacterially expressed full-length human CtBP1. The polyclonal antibody reacts with CtBP1, a 49 kDa transcriptional corepressor (intracellular antigen), that plays a critical role in regulating gene expression.
Predicted Reactive Species	Primate
Cross Reactivity	This antibody does not cross-react with Thy-1.1 alloantigen.
Isotype	Rabbit polyclonal
Form	Liquid
Concentration	1 mg/ml
Purification	Purified by protein-A affinity chromatography.
Suggested Dilutions	Western blotting: Reducing conditions.

Immunocytochemistry: 1 ug/ml, acetone / methanol fixation.
