Overview

Product Name	Anti-Involucrin IVL Rabbit Monoclonal Antibody
Reactive Species	Human, Rat
Description	Boster Bio Anti-Involucrin IVL Rabbit Monoclonal Antibody catalog # M02628-1. Tested in WB, IHC, Flow Cytometry applications. This antibody reacts with Human, Rat.
Application	Flow Cytometry, IHC, WB
Clonality	Monoclonal ABEA-9
Formulation	Rabbit IgG in stabilizing components, phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. *This antibody is supplied in a stabilized formulation. Compatibility with conjugation reactions depends on the chemistry of the conjugation method used. For conjugation methods that are not compatible with the stabilizing components present in this formulation, a carrier-free antibody format is required.
Storage Instructions	Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.
Host	Rabbit
Uniprot ID	P07476

Technical Details

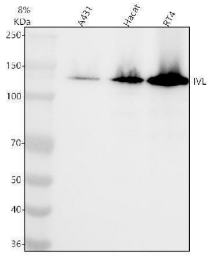

Immunogen	A synthesized peptide derived from human Involucrin
Isotype	Rabbit IgG
Form	Liquid
Concentration	0.5mg/ml
Purification	Affinity-chromatography
Suggested Dilutions	WB 1:500-2000

Anti-Involucrin IVL Rabbit Monoclonal Antibody (M02628-1) Images

Western blot analysis of IVL using anti-IVL antibody (M02628-1). Electrophoresis was performed on a 5-20% SDS-PAGE gel at 70V (Stacking gel) / 90V (Resolving gel) for 2-3 hours. The sample well of each lane was loaded with 30 ug of sample under reducing conditions. Lane 1: human A431 whole cell lysates, Lane 2: human Hacat whole cell lysates, Lane 3: human RT4 whole cell lysates. After electrophoresis, proteins were transferred to a nitrocellulose membrane at 150 mA for 50-90 minutes. Blocked the membrane with 5% non-fat milk/TBS for 1.5 hour at RT. The membrane was incubated with rabbit anti-IVL antigen affinity purified monoclonal antibody (Catalog # M02628-1) at 1:1000 overnight at 4°C, then washed with TBS-0.1%Tween 3 times with 5 minutes each and probed with a goat anti-rabbit IgG-HRP secondary antibody at a dilution of 1:500 for 1.5 hour at RT. The signal is developed using an Enhanced Chemiluminescent detection (ECL) kit (Catalog # EK1002) with Tanon 5200 system. A specific band was detected for IVL at approximately 120 kDa. The expected band size for IVL is at 68 kDa.

Anti-Involucrin IVL Rabbit Monoclonal Antibody

For Research Use Only. Not for use in diagnostic procedures.
