| Product Name         | Anti-CanAg Reference Antibody (Cantuzumab ravtansine)                                                                                                                                                                                      |
| Reactive Species     | Human                                                                                                                                                                                                                                      |
| Description          | Boster Bio Anti-CanAg Reference Antibody (Cantuzumab ravtansine) (Catalog # M34024). Tested in Flow Cytometry, ELISA, FTA. This antibody reacts with Human. Endotoxin: < 0.1038EU/ug,determined by LAL method. Expression system: CHO Cell |
| Application          | ELISA, Flow Cytometry, Functional Assay, Kinetics                                                                                                                                                                                          |
| Clonality            | Monoclonal                                                                                                                                                                                                                                 |
| Formulation          | Purified monoclonal antibody supplied in PBS, pH6.0, without preservative.This antibody is purified through a protein A column.                                                                                                            |
| Storage Instructions | Maintain refrigerated at 2–8°C for up to 2 weeks. For long-term storage, aliquot and store at -20°C to avoid repeated freeze-thaw cycles.                                                                                                  |

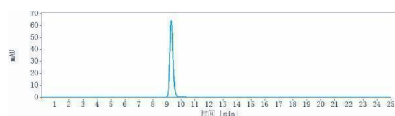

### Technical Details

|         |        |
|---------|--------|
| Isotype | IgG1   |
| Form    | Liquid |

## Anti-CanAg Reference Antibody (Cantuzumab ravtansine) (M34024) Images

Anti-CanAg Reference Antibody (Cantuzumab ravtansine) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-CanAg Reference Antibody (Cantuzumab ravtansine) is more than 95%
