Anti-Annexin A10/ANXA10 Antibody Picoband®

Catalog Number: PA2077

About ANXA10

ANXA10 (Annexin A10) is a member of the annexin family of calcium-dependent phospholipid-binding proteins. By FISH, Morgan et al. (1999) mapped the ANXA10 gene to chromosome 4q33. Morgan et al. (1999) suggested that the ablation or depletion of principal calcium-binding sites in annexins A9 and A10, respectively, may dispose them to function in distinct tissue environments where calcium sensitivity is not a major functional determinant.
